PROFESSIONAL SUMMARY

Passionate and driven Software Engineer currently pursuing a BSc in Software Engineering at Bugema University (2nd Year). Brings 2+ years of hands-on open source development experience across global platforms spanning healthcare informatics, financial inclusion, and cloud-native observability. Proven track record as Lead Developer on a full-stack school accounting system, with active contributions to world-class open source ecosystems including OpenMRS, Mifos Initiative, and OpenTelemetry. Adept at building scalable, impactful solutions across multiple technology stacks.

TECHNICAL SKILLS

Programming Languages: Java, Python, TypeScript, JavaScript, C#, HTML, CSS

Frameworks & Libraries: React, Spring Boot, Django

Tools & Platforms: Git, GitHub, Docker, VS Code, Eclipse IDE, Jira

Areas of Expertise: Full-Stack Development, Open Source Contribution, Cloud Observability, HealthTech, FinTech

OPEN SOURCE CONTRIBUTIONS

OpenMRS — Electronic Medical Records System | Contributor | 2023 – Present (2 Years)

openmrs.org · Used in 80+ countries, 8,100+ facilities, 16M+ patients

- ▶ Contributed to the world-leading open-source EMR platform designed to improve healthcare delivery in resourceconstrained environments.
- ▶ Worked on features supporting patient records management, diagnoses, prescriptions, and clinical workflows for low-and middle-income countries.
- ▶ Collaborated with a global community of developers, physicians, and health informatics professionals.

Mifos Initiative (Apache Fineract) — Financial Inclusion Platform | Contributor | 2025 – Present (1 Year)

mifos.org · Serving 6M+ clients across 250+ institutions in 36 countries

- ▶ Contributed to an open-source core banking platform enabling microfinance institutions and financial cooperatives to deliver services to the world's 2 billion unbanked.
- ▶ Worked on cloud-ready, API-driven financial infrastructure used by fintech innovators across developing markets.
- ▶ Collaborated under the Apache Software Foundation ecosystem on scalable digital financial services features.

OpenTelemetry (OTel) — Cloud-Native Observability Framework | SDK Contributor | 2024 – Present (1 Year)

opentelemetry.io · CNCF Graduated Project — 2nd largest contributor base after Kubernetes

- Contributed to the industry-standard, vendor-neutral observability framework for cloud-native software, providing APIs, SDKs, and tooling for traces, metrics, and logs.
- Worked on SDK components that enable developers to instrument distributed applications and export telemetry data to any compatible monitoring backend.
- Engaged with a global CNCF community across enterprise, cloud provider, and independent contributors.

PERSONAL PROJECTS

Kitoma School Accounts System | Lead Developer github.com/ELVIS-KATO/Kitoma-Secondary-School

- Designed and built a full-stack school financial management system to monitor income and expenditure across daily, weekly, monthly, and termly periods.
- Implemented automated report generation and receipt generation features for school administrators and stakeholders.
- Served as sole lead developer, handling system architecture, backend logic, frontend UI, and deployment(locally).

Rakai Nursing School System | Lead Developer github.com/ELVIS-KATO/SCHOOL-MANAGEMENT

- Designed and built a full-stack school Students management system to monitor Personal, Academic and Financial records for students.
- Implemented user roles in it of the student's view, admin, and staff.
- Served as sole lead developer, handling system architecture, backend logic, frontend UI, and Local deployment.

EDUCATION

Bachelor of Science in Software Engineering

Bugema University, Kampala, Uganda | 2nd Year (In Progress) | Expected Graduation: 2027

- Pursuing a rigorous undergraduate curriculum covering software design, algorithms, databases, and systems engineering.
- Actively balancing academic studies with real-world open source contributions across globally impactful projects.

CORE COMPETENCIES

Collaborative Teamwork · Open Source Community Engagement · Problem Solving · Self-Directed Learning · Attention to Detail · Cross-Cultural Communication · Agile Development (Jira)
